BORN FROM FAILURE

2015

FAILURE IN THE FIELD

It started in 2015, deep in Maine's unforgiving backwoods. What was meant to be a routine outdoor trip turned into something else entirely when the gear started to fail. Knives chipped. Edges dulled. When performance mattered most, even the "best" blades fell short. That moment exposed a real problem, and it demanded a real solution.

2016

RAISING THE STANDARD

After a hard lesson in failure, we vowed to create something better - knives that don't quit. What followed was a focused development process and our first out-the-front knife, built with one mission in mind: to serve those who depend on their blades when there's no room for compromise.

That's where TEKTO® was born. 2016. And we've been standing behind that promise ever since.

2025
